

When Should You Propose

To Your Partner

It is too soon if...

They don't show interest when you talk about your future together or act distant.

You have only been with them for a few weeks or months.

You haven't had any arguments and have not shown them your vulnerable side, nor seen theirs.

The relationship is more physical than emotional; you haven't bonded over meaningful talks.

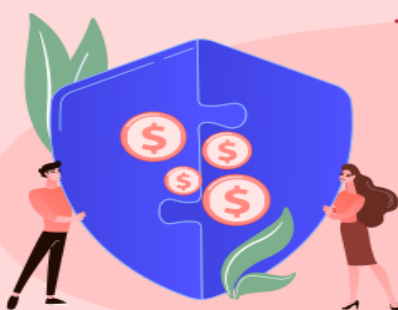

It is the right time if...

You know each other's deepest secrets, yet the love remains the same.

You both get excited and not nervous while thinking about starting a family together.

You have been together for quite a few years and have your family's blessing.

You are financially stable to start a married life together.
