

Points To Consider When Using A Diaper Rash Cream

Always clean the baby's bottom before applying the cream.

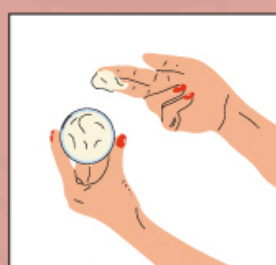

Ensure to pat dry the baby's bottom before applying the cream.

Ensure to apply the cream with clean hands.

Apply the diaper rash cream in thick layers for optimum protection.

Use your fingers or cotton pads to apply the rash cream.

Allow the cream to dry completely before putting on the new diaper.

Remove the diaper rash cream whenever you change the diaper next or at the end of the day.

For severe diaper rashes, opt for creams recommended by your dermatologist.
