

HOW TO PREVENT MALARIA DURING PREGNANCY

Maintain a cool temperature inside the house and avoid hot places.

Check if the place you are visiting is a malaria-prone zone and avoid it if it is one.

Wear light-colored and full-length clothes, especially while traveling.

Try sleeping in Insecticide-treated bed nets (ITN) that repel mosquitoes.

Follow the complete anti-malaria medicine course of Intermittent presumptive treatment (IPT) under doctor's consultation.
