

Astonishing Space Facts

For Children

There are more than 200 billion stars in our galaxy.

No sounds can be heard in the space.

One year in Neptune equals 164.8 years on Earth.

When on a space mission, astronauts consume only liquid food.

A complete NASA space suit costs around \$12,000,000.

Radio waves

Astronauts use radio waves (since these waves require no medium for transmission) to communicate.

Although mercury is the planet closest to the sun, Venus has a higher surface temperature (about 900°F).

3 MILLION X

The black hole is reportedly about 3 million times bigger than the Earth.
