Different Types Of LUNCH BOXES And Their Benefits

**Boxes with a thermal-lock container** allow you to simultaneously store hot and cold foods.

Insulated boxes feature an in-built uniform insulation layer to maintain the food's temperature.

Boxes with compartments facilitate proper food portioning without creating a mess.

Boxes with insulated bags are ideal for boxes that lack internal insulation.

Boxes with stackable compartments enable better food separation and organization.

Lunch box sets feature individual boxes that can be used separately based on the meal size.
