

Always wipe from front to back and never the other way around.

Ration the use of wipes to reduce the risk of dryness.

If your child often develops diaper rashes, try changing the wipes.

Never use a wipe on broken or damaged skin.

Let the skin dry properly after using the wipes and before securing the new diaper.

Avoid flushing the wipes down the toilet to prevent clogging and plumbing issues.

Discard disposable wipes in lidded trash cans that are lined with a trash bag.
