

# TIPS ON PLAYING WITH HOT WHEELS TRACK SET

Make the setup on an open and plain surface, such as the backyard or a room with enough floor space.

Always make the child play under adult supervision to prevent reckless handling.

Let the children sit at a safe distance from the track set. You may refer to the box to check the distance recommended.

Don't place anything in the track as an obstruction, as the car may topple and injure someone.

Discourage children from handling the small cars and other components as they may accidentally lose or swallow them.

Keep the track dust-free to reduce friction and maintain the smooth functioning of the set.
