

Near lamps and freestanding lights to prevent fire hazards.

Under wall hangings to prevent the risk of injuries from loose and falling hangings.

Close to furniture to keep the child from fidgeting with them.

Nearby electric cords and power plugs to reduce the risk of shocks.

Next to the curtain to prevent accidental suffocation.

Close to window blinds as their cords can increase the risk of strangulation.

Next to a window to safeguard the baby from direct sunlight.

Right next to doors, as they can potentially cause the bassinet to topple when slammed shut or opened.
